

Treating PTSD (Day 1-2) and Complex Trauma (Day 3-4) with Dr Leah Giarratano delivered live online and in self-paced homestudy for private groups of 40 clinicians.

Groups of a minimum of 40 mental health professionals, can access our Day 1-2 or Day 1-4 highly interactive livestream in your time zone on your preferred dates for 30% off our regular fee. This offer comes with an additional four-month access to our self-paced online program following your scheduled livestream to consolidate learning.

Members of your group can participate fully from any location live using a laptop with a camera and microphone, providing they have internet speeds of at least 15 Mbps. Printed materials for your preferred program will be mailed to key locations to be distributed to your delegates in the week/s before our livestream with your group.

If any members of your group cannot join the livestream program on the scheduled days for your group for any reason, they can join one of our scheduled livestream programs in the following six months to avoid the loss of their fee.

Our Day 1-2 program attracts between 14 and 19 professional development hours and our Day 1-4 program attracts between 28 and 42 professional development hours depending upon the components that your group members complete (which include the livestream, a quiz for each day, and two or four structured trauma case formulations). Contact us now if you wish to organise training for your group.
